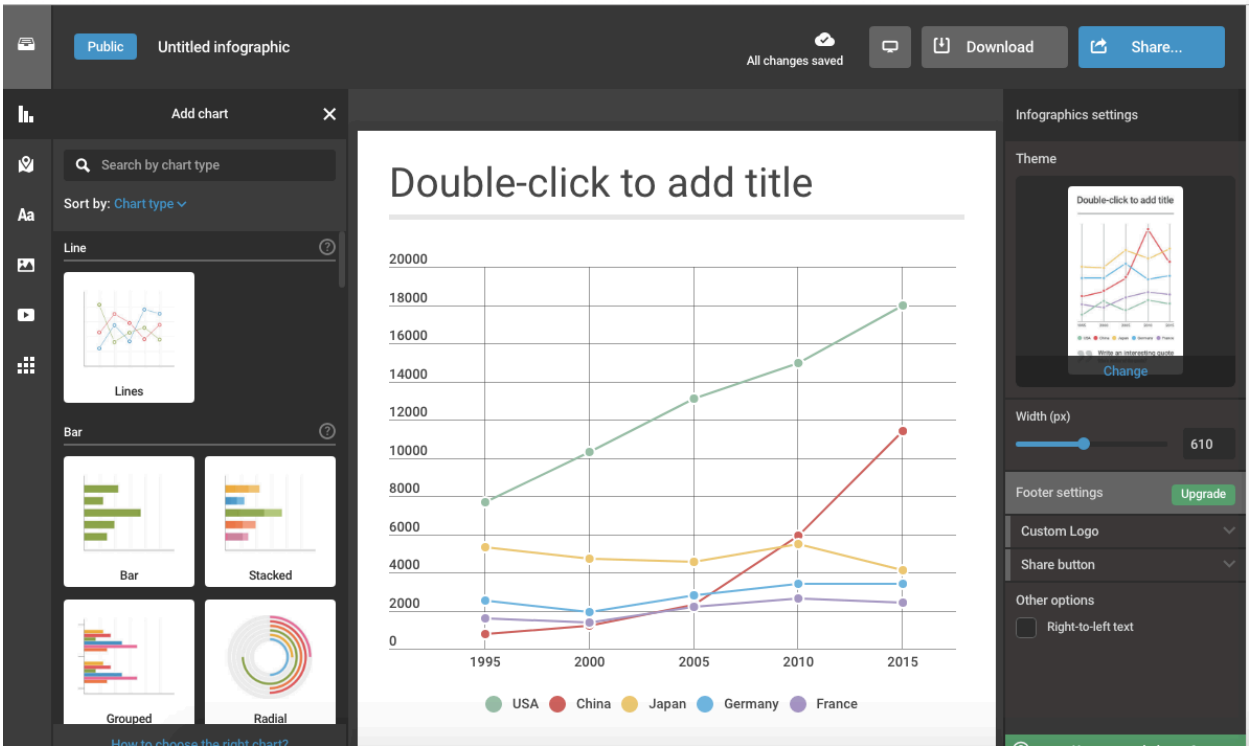
数据可视化应用（Infogram） - https://infogr.am (注意翻墙访问)

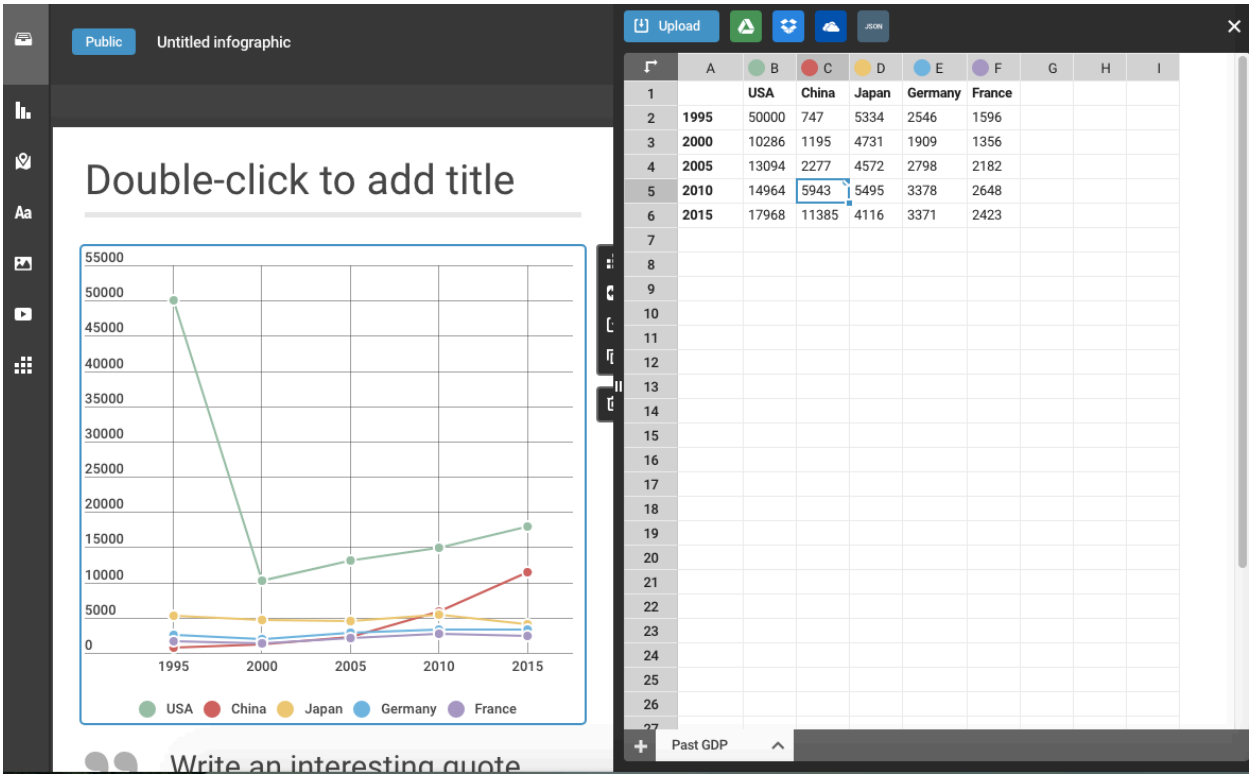
- **Infogram** lets you link their visualizations and infographics to *real time* big data. And that's a big plus. A simple 3-step process lets you choose among many templates, personalize them with additional visualizations like charts, map, images and even videos, and you are ready to share your visualization. **Infogram** supports team accounts for media publishers and for journalists, branded designs for companies and classroom accounts for educational projects.(Infogram官方的介绍)

可借鉴的方面

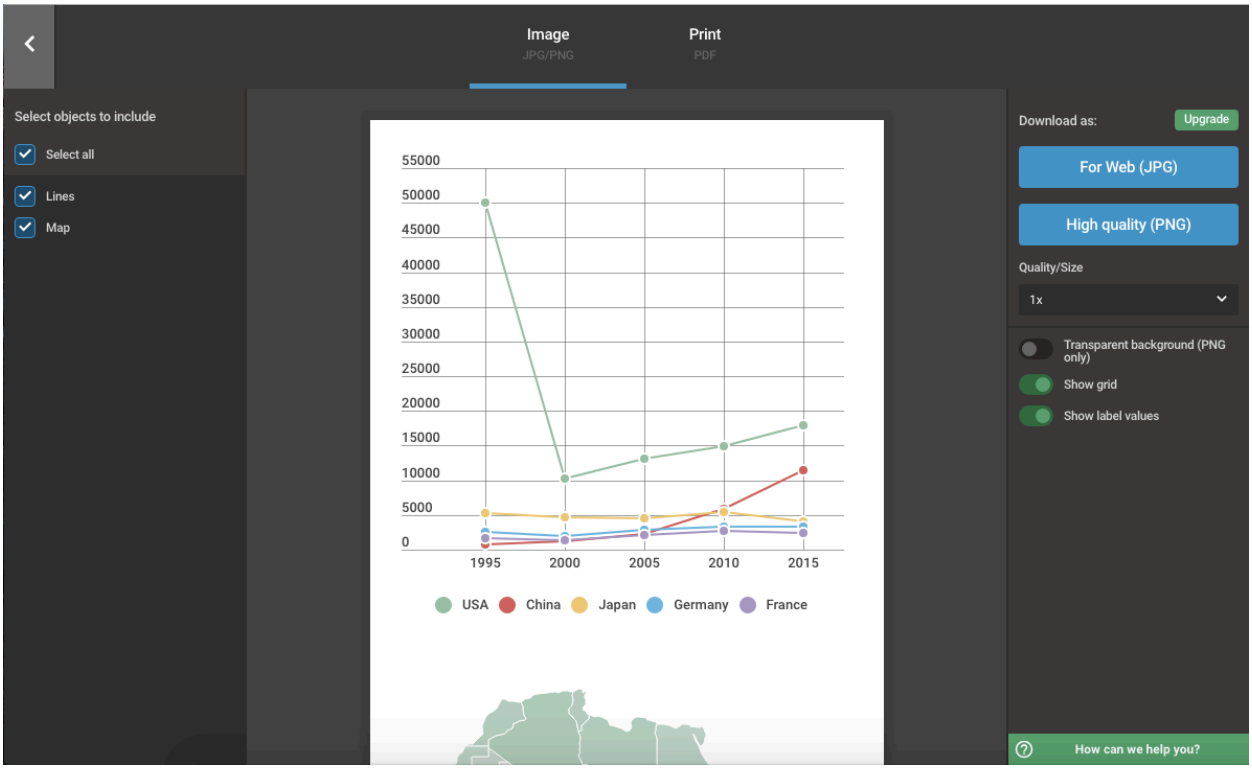
1. 这个数据可视化分析器是值得一做的，左边是要选择的图表类型，中间是一个可编辑文档，右侧是针对图表的属性设置，就是一个制作数据报表的web-ide。



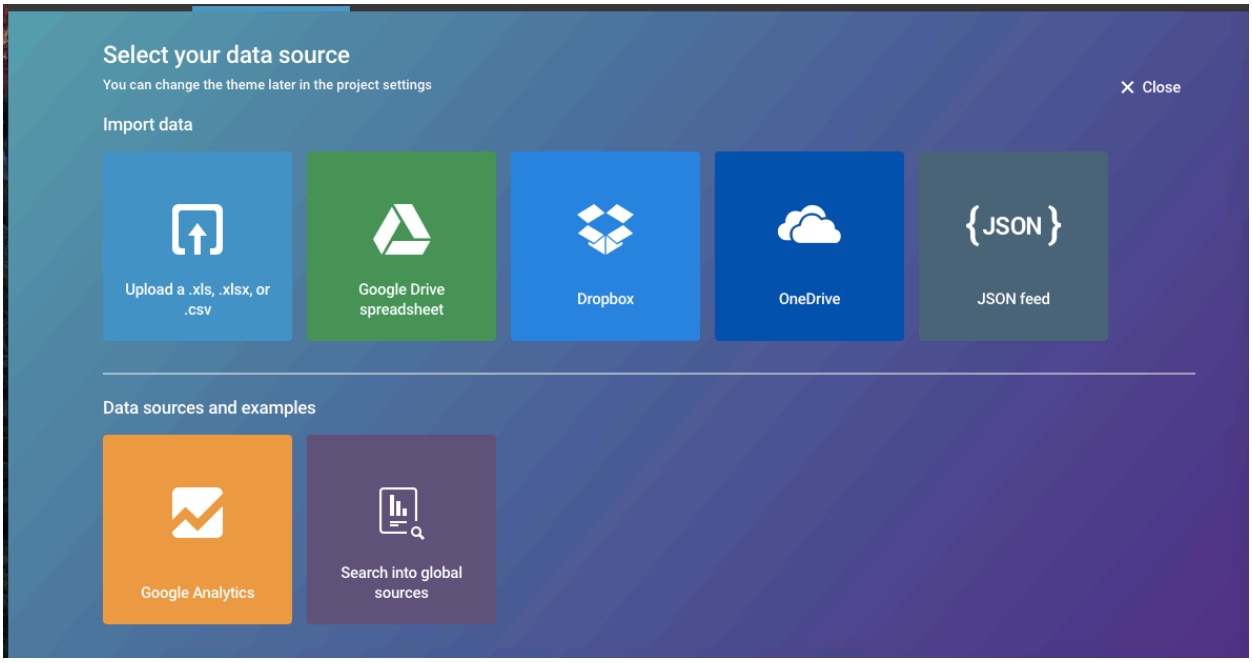
2. 交互式数据编辑，右侧是数据，左侧是对应生成的图标。

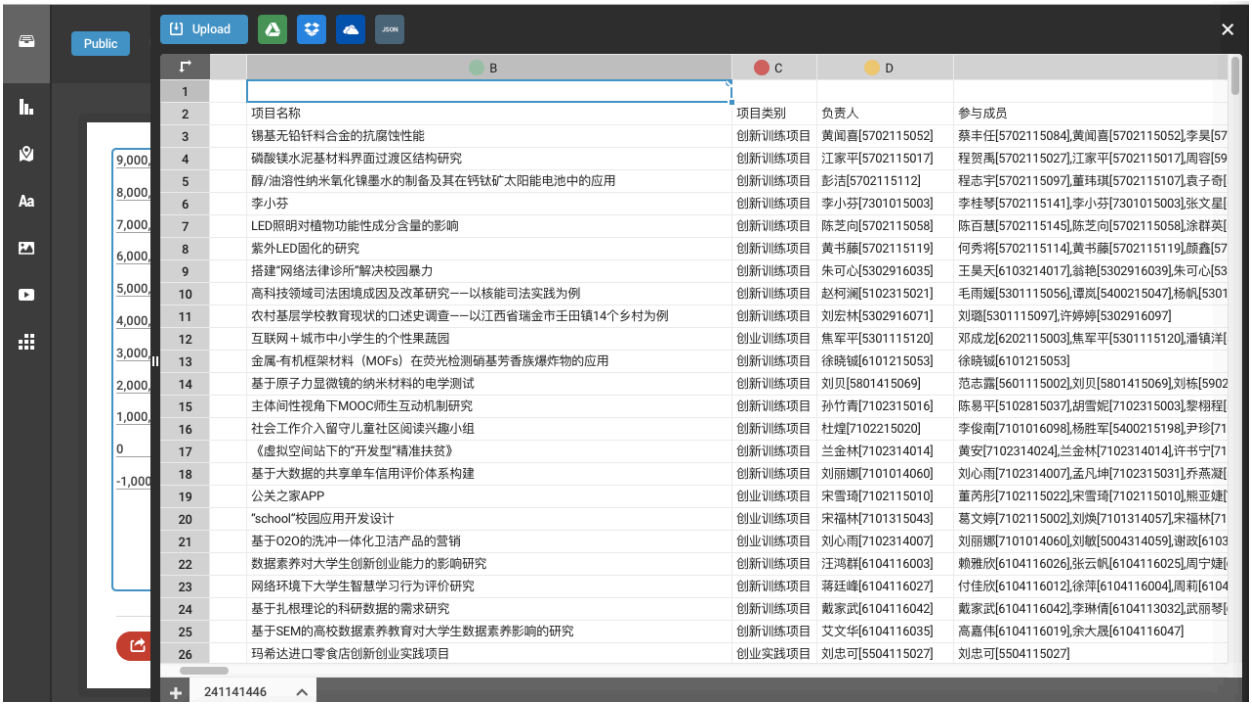


3. 生成报表下载到本地



4. 上传用户自己的数据源（.xls,xlsx,.csv,json）





5. 一些精彩的demo
